Of Interest To Veterans

UNUSUAL MEDICAL EXPENSES

VA pensioners age 72 and over who do not receive annual income questionnaires should consider reporting their total medical expenses for the yeat to the VA, as this may increase the amount of pension they receive. The reason is that current law provides that there will be excluded from the amount of the veteran's annual income any unreimbursed amounts which have been paid for "unusual medical expenses." The VA considers all medical expenses which exceed 5 percent of the pensioner's reported income to be "unusual medical expenses."

A person age 72 and over may not receive a questionnaire card, but if he does not report his medical expenses, the VA cannot give him a lump sum adjustment. The VA Form 21-8416a titled "Request for Information Concerning Family Unusual Medical Expenses," can be used to report the medical expenses paid during the calendar year. The medical expenses may have been incurred by the pensioner himself, or by relatives his under obligation to support.

Medical expenses can include such items as health insurance premiums (including $6.70 per month for Medicare premiums), doctor fees, medicine, nursing care and hospital charges. Also included is transportation expenses for medical purposes (7 cents per mile plus parking and tolls or actual fares for taxi, buses, etc.). Other examples include, orthopedic appliances, dental services, eye glasses and hearing aids and batteries.

When these expenses are reported, the VA will take into consideration the total expenses reported and total income received at the end of the calendar year, and if the claimant is due additional pension, a lump sum adjustment check will follow.
